- » Engaged in DEI, Lab Planning, and Sustainability committees to strengthen firm culture

SELECTED PROJECTS

VILLANOVA IADAROLA CENTER November 2024 - June 2025

ROLE / Designer AREA / 60,800 SF STATUS / Bidding

Interior fit-out of a new vivarium facility for Villanova University. The project included designing suites for nursing and physical brain science departments in an existing science center. Responsibilities included creating multiple layout schemes to present to the client, incorporating Principal Investigator requests into laboratory design, and redline adjustments.

PRECISION MILLING FACILITY January - November 2024

ROLE / Designer AREA / 87,000 SF STATUS / Construction

Interior fit-out of office areas, manufacturing spaces, and accessory storage for a precision milling company. The project included facade demolition and infill for new exterior doors. Responsibilities included coordinating consultant communication, maintaining and distributing meeting minutes, document development, and delegating tasks between internal project teams.

WAWA, INC. February 2021 - January 2024

ROLE / Project Manager AREA / varies STATUS / Completed

Post Occupancy Evaluations of Wawa's Corporate Campus to renovate existing conditions to meet current staffing demands. Responsibilities included coordinating client communications, site visits and surveys, workspace fit outs for expansion, and maintaining the Wawa Facilities Document. This document highlights the current layout of each building on Wawa's campus.

NUCLEAR MEDICINE FACILITY January - December 2022

ROLE / Designer AREA / 22,000 SF STATUS / Completed

A new build for a nuclear medicine manufacturing facility designed to support development, distribute medicine, and provide a supply of reactor-based isotopes. The project included an office connected to the secured isotope development laboratories. Responsibilities included drawing set development and flow diagram development.
